AND MASSACHUSETTS GENERAL HOSPITAL

CENTER FOR
CONNECTED HEALTH

PARTNERS HEALTHCARE CONNECTED HEALTH

Partners HealthCare Connected Health is a leading force in the use of technology to deliver care outside of a hospital or doctor's office. Applying personal health technologies, including remote monitoring, mobile health, personal health trackers and sensors, we are creating new solutions for empowering individuals and providers to better manage health and wellness. Partners Connected Health is affiliated with Harvard Medical School teaching hospitals, including Brigham and Women's Hospital and Massachusetts General Hospital.

Partners Connected Health started 20 years ago with a vision to apply existing technologies to connect patients and providers in order to improve clinical outcomes, and give providers accurate, timely data and the tools needed to make sound medical decisions. A big part of our mission has also been to help advance the industry and facilitate important dialogue to inform, educate and inspire innovation to disrupt healthcare delivery. Over the past twelve years, the Connected Health Symposium has become an important venue for healthcare providers, hospitals, payers, government agencies, investors and technology developers to convene, share ideas and establish partnerships that are changing healthcare delivery for the future.

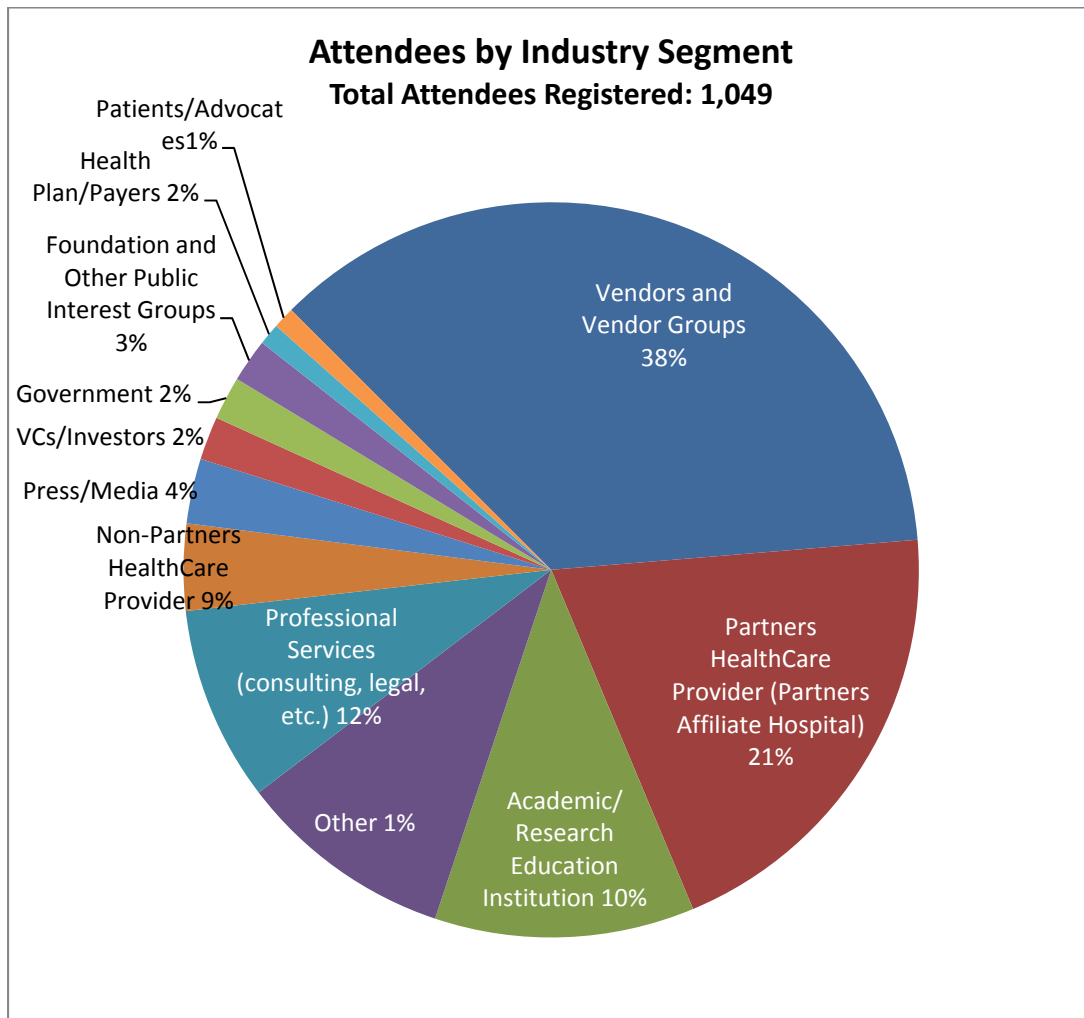

At Partners Connected Health, we are proud to be considered visionary and leaders in the development and deployment of connected health strategies, and are in a position to share this knowledge and vision to help advance our industry via the Connected Health Conference.

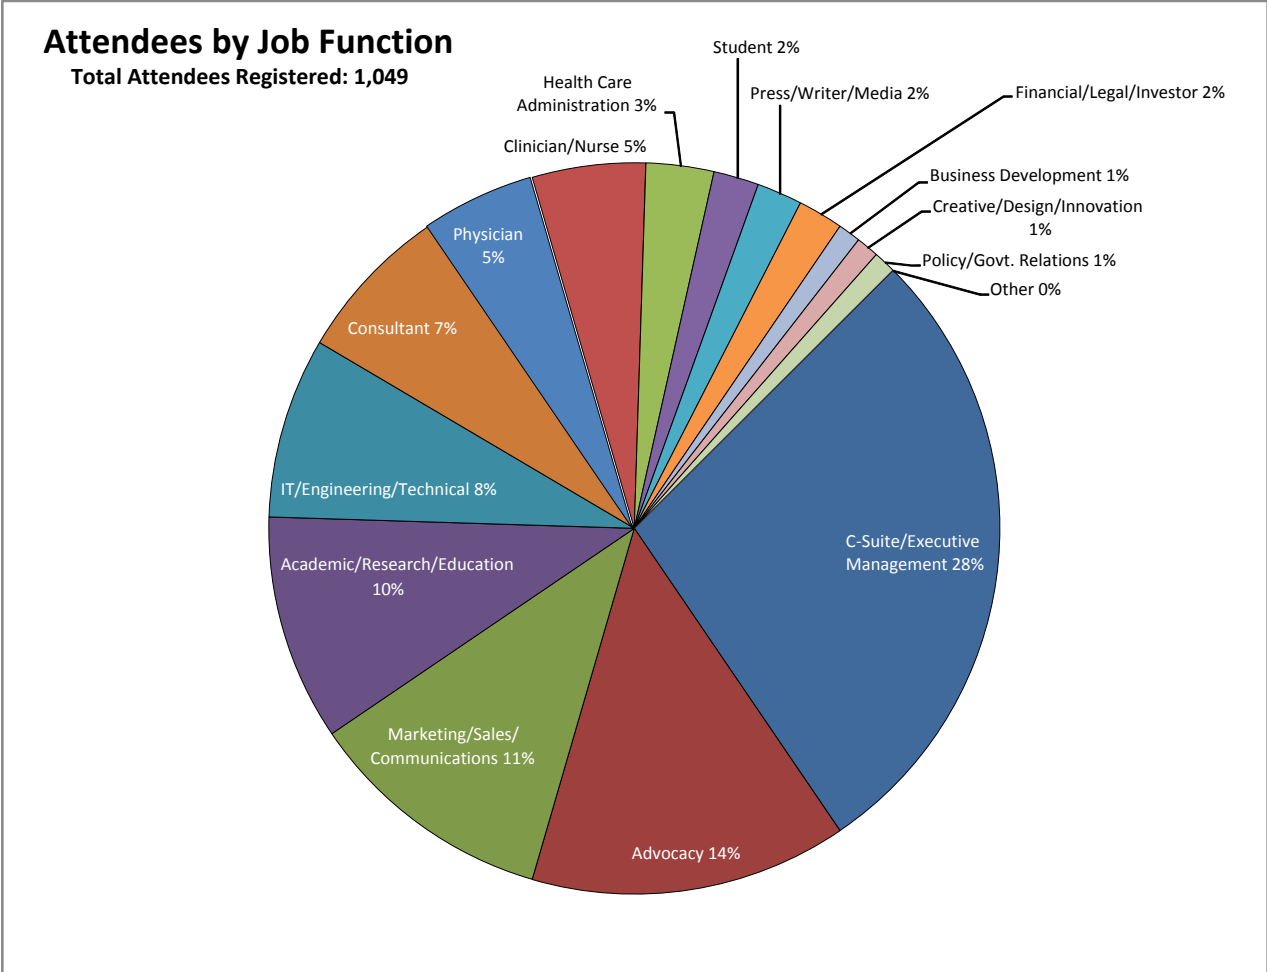

The annual Connected Health Symposium convenes thought leaders in an effort to grow the rapidly-expanding connected health marketplace. The Symposium is a change-agent conference that promotes innovative thinking and the application of personal consumer health technologies to support new models of care delivery. With a focus on trends at the intersection of technology and new models of health care delivery, the Symposium convenes thought leaders in an effort to grow the rapidly-expanding connected health marketplace. Our audience is a high-profile gathering of innovators, researchers, industry representatives and policymakers who gather for knowledge-sharing across the connected health landscape. Over 100 speakers and more than 1,000 attendees come together to define the future of care delivery and impact the day-to-day lives of patients.

SYMPOSIUM 2015 ATTENDEE DEMOGRAPHICS & PROFILE

Our 12th Annual Symposium was held October 29 and 30, 2015, at the Seaport Hotel and World Trade Center in Boston. Our theme for 2015 was “The Internet of Healthy ThingsSM: Integrating Connected Health into Real World Care Delivery.” Agenda emphasized real world examples of how connected health is having an impact on improved patient engagement, care outcomes and highlighting successful business models. Sessions involved educating the market on what we see coming 5-7 years out as well as highlighting success stories of technologies applied in other industries where lessons learned can inform how we implement similar technologies in healthcare.

The Symposium consistently convenes a multi-disciplinary, diverse audience of over 1,000 health leaders world-wide: hospital executives, community-based MDS, health plan leaders, Fortune 500 employers, policy makers, researchers, technology developers, leading investors, patients and advocates. The program draws decision-makers from major institutions. In 2015, 28% of our audience were C-level/Executive management professionals.

Top attendee job functions reported included 28% C-Suite/Executive Management level, 10% Physician, Clinician and Nurses, 3% Health Care Administration, 14% Advocacy, 11% Marketing, Sales and Communications; 10% Academic/Research/Education; 8% IT/Engineering and 7% Consulting.

Clinician/Physician Attendance

While 5% of attendees reported their job functions as clinician/nurse and 5% physician, those reporting clinical, nursing and physician degrees were as follows: clinical 8 (1%), nursing 35 (3%) and physician 161 (15%).

Degree	2015
Clinicians/MDs	169
Nurses	35

Symposium 2015 Attendees by Location

Symposium 2015 had 1,049 attendees registered, 992 from the U.S. and 57 International.

Total Attendees Registered: 1,049

992 attendees registered were U.S.-based, representing 34 states, distributed by regions below.

More specifically, distributed by geographic division below:

Breakdown by Division

And, by individual state:

U.S. - 34 States Represented, 992 Attendees

Symposium 2015 drew 57 international attendees, representing 16 countries:

International Attendee Breakdown - 16 Countries Represented by 57 Attendees, 1,049 Total Registered

SPONSORS AND EXHIBITORS SHOWCASED AT SYMPOSIUM 2015

Each year, than more 1000 attendees are exposed to new offerings, products, ideas, and services courtesy of our sponsors and exhibitors.

Who attends the Connected Health Expo:

- **Providers:** integrating innovations in healthcare delivery
- **Researchers:** showcasing personal connected health
- **Developers:** applying user-friendly design to make health addictive
- **Healthcare Executives:** reducing costs and improving outcomes
- **Patients:** using new tools for better self-management

The following companies sponsored the Symposium and/or exhibited state-of-the-art products and applications in the exhibit hall. For the second year, entry-level Start-up companies were provided a pavilion to showcase their work.

Platinum Expo Sponsors: Cognizant, InterSystems

Diamond Expo Sponsor: Philips

Gold Expo Sponsors: California Healthcare Foundation, Cognition, Cooley, LLP, iGetBetter, Validic

Expo Sponsors: EY, Salesforce Healthcare and Life Sciences

Advertiser: McDermott, Will & Emery

Satellite Session: Microsoft

Exhibitors:

FOUNDED BY BRIGHAM AND WOMEN'S HOSPITAL
AND MASSACHUSETTS GENERAL HOSPITAL

CENTER FOR
CONNECTED HEALTH

WHERE INNOVATORS IN HEALTH CARE, COMMUNICATIONS & TECHNOLOGY CONNECT

The annual Connected Health Symposium is run by one of the first institutions to integrate connected health solutions in practice. The program is hosted by **Partners HealthCare Connected Health**, a respected leader in successfully developing and implementing care delivery using personal connected health strategies. The Center's initiatives support Harvard Medical School teaching affiliated hospitals including Brigham and Women's and Massachusetts General Hospitals.

Partners Connected Health's Founder and Vice President, **Joseph Kvedar, MD**, is a **recognized visionary** in changing care delivery via technology, and empowering and engaging patients to self-manage their health and wellness.

Partners HealthCare, one of the original Accountable Care Organizations, is 'walking the talk' to change payment structures, incorporate population health management and design the future of care delivery using technology-based, patient centered programs. Learn from this pioneering ACO.

Why you should be a part of the Connected Health Symposium:

- **Attendance by target customers**, e.g. decision makers from health systems, payors, senior clinicians, etc.
- The **opportunity to learn** from others in the industry who have had success in developing and implementing connected health solutions
- **Industry specific content** on how to successfully implement connected health
- Various **Networking opportunities** (receptions, networking activities throughout the day, online meeting facilitation tool)

What you'll learn:

- **What leading health care systems are doing today** to keep patients healthy at home
- **Review the latest trends, new research and innovations** about to revolutionize care delivery
- **Experience demos of groundbreaking devices and systems** addressing the challenges of managing health, wellness and disease management
- **Discover novel programs** to reduce health care spending
- How to **make health and wellness part of everyday life**
- **Better understand** the important patient-provider relationship, and how it can be enhanced by technology

JOIN US FOR SYMPOSIUM 2016!

The 13th Annual Connected Health Symposium, *Wearables and Digital Therapeutics: New Frontiers in Patient Engagement*, is scheduled for **October 20-21, 2016**, and will return to the Seaport Hotel & World Trade Center, Boston, MA. Details on the 2016 program will be coming soon: <https://symposium.connectedhealth.org>.
